## Profile & Core Competencies

New Vision Commercial Builders has provided general contracting and construction management services in Southern California since 1999. New Vision Commercial Builders specializes in interior and exterior renovations and finishes (i.e. framing, dry wall, flooring, doors and windows) for commercial, TI, retail, school and municipal projects. Additional services include design-build services, roofing, plumbing, light electrical and concrete.

Above all, New Vision is a company that stands on its integrity. We take great pride in the excellent working relationships we have built with our clients during the past 15 years and will not waiver on our commitment to any project we accept. We're a closely held, client-driven company that believes in diversity, as evidenced by the professional tradesmen and subcontractors we employ. Our organizational structure is relatively flat so clients and personnel can readily access our management team, who take an active role in all New Vision operations. A member of the management team is assigned to every project and is accountable for its success.

New Vision's experience and business maturity enables us to provide excellent client services for successful construction of new and renovated facilities.

## Our Promise to You.
